Anchor Bolts in Concrete for Wood Frame Construction ...
A concrete anchor is a steel shaft either cast into concrete at placement or post-installed after the concrete has hardened. Cast-in anchors are threaded shafts with a buried end termination of a hex head, threaded nut, or 90° (L-) or 180° (J-) hook, or headed (non-threaded) studs welded to a surface plate.

Read an Excerpt. Portland cement concrete is foremost among the construction materials used in civil engineering projects around the world. The reasons for concrete's preeminence are varied, but among the more important are the economic and widespread availability of its constituents; its versatility and adaptability, as evidenced by the many types of construction in which it is used; and the ...

Concrete / Edition 2|Hardcover - Barnes & Noble
The Anchorage Yacht Club was the first of its kind in New York; it went from a privately owned marina to an ‘Aquaminium’. There are 460 deeded boat slips which are individually owned. There are many advantages in owning your own slip, the most notable being that you’re not paying rent that you will never see again.
