WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable strive towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army—Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and supervisors to stop the intimidation during the exam. Thanks to LIPACE and the “Turning the Tide” project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia

In recent years there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student’s knowledge and skills.

Develop your grade 7 students sentence editing, punctuation, grammar, vocabulary, word study, and reference skills using 180 focused 10- to 15-minute daily activities.

Praise for THE TRAVELS OF A T-SHIRT IN THE GLOBAL ECONOMY "Engrossing . . . (Rivoli) goes wherever the T-shirt goes, and there are surprises around every corner . . . full of memorable characters and vivid scenes." —Time "An engaging and illuminating saga. . . Rivoli follows her T-shirt along its route, but that is like saying that Melville follows his whale. . . Her nuanced and fair-minded approach is all the more powerful for eschewing the pretense of ideological absolutism, and her telescopic look through a single industry has all the makings of an economics classic." —The New York Times "Rarely is a business book so well written that one would gladly stay up all night to finish it. Pietra Rivoli's The Travels of a T-Shirt in the Global Economy is just such a page-turner." —CIO magazine "Succeeds admirably . . . T-shirts may not have changed the world, but their story is a useful account of how free trade and protectionism certainly have." —Financial Times "[A] fascinating exploration of the history, economics, and politics of world trade . . . The Travels of a T-Shirt in the Global Economy is a thought-provoking yarn that exhibits the ugly, the bad, and the good of globalization, and points to the unintended positive consequences of the clash between proponents and opponents of free trade." —Star-Telegram (Fort Worth) "Part travelogue, part history, and part economics, The Travels of a T-Shirt in the Global Economy is ALL storytelling, and in the grand style. A must-read." —Peter J. Dougherty, Senior Economics Editor, Princeton University Press author of Who's Afraid of Adam Smith? "A readable and evenhanded treatment of the complexities of free trade . . . As Rivoli repeatedly makes clear, there is absolutely nothing free about free trade except the slogan." —San Francisco Chronicle

This Revised edition of A New Geography of Ghana is written specially for the WAEC O' Level syllabus and provides full coverage of Section A of Paper 2.

Maps organize us in space, but they also organize us in time. Looking around the world for the last five hundred years, Time in Maps shows that today’s digital maps are only the latest effort to insert a sense of time into the spatial medium of maps. Historians Kären Wigen and Caroline Winterer have assembled leading scholars to consider how maps from all over the world have depicted time in ingenious and provocative ways. Focusing on maps created in Spanish America, Europe, the United States, and Asia, these essays take us from the Aztecs documenting the founding of Tenochtitlan, to early modern Japanese reconstructing nostalgic landscapes before Western encroachments, to nineteenth-century Americans grappling with the new concept of deep time. The book also features a defense of traditional paper maps by digital mapmaker William Rankin. With more than one hundred color maps and illustrations, Time in Maps will draw the attention of anyone interested in cartographic history.

This well-established series, the most popular in Nigeria, has been fully revised to reflect recent developments in mathematics education at junior secondary level and the views of the many users of the books. It has especially been revised to fully cover the requirements of the new NERDC Universal Basic Education Curriculum.
