

4140 Heat Treating Guide

Thank you definitely much for downloading **4140 heat treating guide**. Maybe you have knowledge that, people have see numerous period for their favorite books once this 4140 heat treating guide, but stop happening in harmful downloads.

Rather than enjoying a good book bearing in mind a cup of coffee in the afternoon, instead they juggled with some harmful virus inside their computer. **4140 heat treating guide** is available in our digital library an online entrance to it is set as public in view of that you can download it instantly. Our digital library saves in combined countries, allowing you to acquire the most less latency era to download any of our books next this one. Merely said, the 4140 heat treating guide is universally compatible when any devices to read.

For 4140 steel, the recommended heat treatment consists of heating to austenitizing temperature, typically 1570°F (855°C), followed by oil quenching. Tempering (reheating after quenching) will achieve the desired hardness range.

Re: How to heat treat 4140. Heat to 1500-1600° F and hold 1-1/2 hour per inch of greatest thickness. Quench into 150° F oil. Temper immediately after quenching, before the part has cooled to below 150° F. Parts should be held 1 hour per inch of thickness, 2 hours minimum. A single temper is sufficient.

~~How to heat treat 4140—The Home Machinist!~~

Heat Treatment. The maximum hardness that can be obtained in any steel depends on carbon content. The section size in which maximum hardness can be obtained depends on alloy content. 4140 has a nominal carbon content of .4% and this carbon content will yield a hardness of Rc 51 for a 90% martensitic structure (9th Edition of the ASM Material Handbook, Volume I).

~~Hardness of Heat Treated 4140—Metal and Metallurgy ...~~

740. Peter, 4140 is a very strong and versatile material but it can be made much better for specific applications through heat treatment. One can dramatically increase wear resistance, shear strength, rigidity or general toughness with a little extra work. Sometimes it just comes down to what you have on hand.
