The Airbus A380 is the world ' s most recognised and most talked about airliner since the Boeing 747 and Concorde appeared in the skies in the late 1960s. Designed to challenge Boeing's monopoly in the large-aircraft market, it made its first flight in April 2005, entering commercial service two years later with Singapore Airlines. This jet has become so popular that every four minutes--24 hours a day, seven days a week--an A380 is taking off or landing somewhere in the world. There is no other development in recent aviation history to rival this remarkable aircraft.

This is a 400 page 6 X 9 inch Black and White paperback version of Captain Mike Ray's "Unofficial Airbus 320 Series manual". This document is presented as a less expensive version of that document. And while it incorporates all of the features and information, it lacks the beautiful color and lay-flat characteristics of the original document.
