~~14.1: Defining Climate . by Prezi~~  
Federal Aviation Administration

~~Federal Aviation Administration~~

Climate refers to the average weather conditions in a place over many years (usually at least 30 years, to account for the range of natural variations from one year to the next). For example, the climate in Minneapolis is cold and snowy in the winter, while Miami's climate is hot and humid.

overview of the California Highway Patrol (CHP) and is designed to prepare Cadet, CHP, applicants for the selection and hiring process. Information contained in this guide focuses on the Department's mission, purpose, and objectives as well as the duties of the CHP officer.

## ~~Applicant Study Guide – California Highway Patrol~~

Climate is defined not only by average temperature and precipitation but also by the type, frequency, duration, and intensity of weather events such as heat waves, cold spells, storms, floods, and droughts. While the concepts of climate and weather are often confused, it is important to understand the difference.

Chapter 14, the beginning of Part Four, describes the Scientific Revolution. Harari states that prior to AD 1500, technology had remained relatively stagnant. While minor advances were made, he argues that someone could fall asleep for 500 years and wake up in a relatively similar world. This changed, however, when leaders began to invest significantly in scientific research, realizing that it could yield better technology and thus more resources at their disposal.
