Chapter 11 Thermodynamics 11.1 Heat,
work and energy - Heat is the energy that
is the process of being transferred from
one to another due to a temperature
difference - Work is energy that is being
transferred due to the action of a force -
James Joule's careful experiments led to
the law of conservation of energy -
Normally when a substance is heated, its
particles gain kinetic energy - During a
phase change, the heat energy increases
the distance between particles.
