it was apparent that many changes over the previous generation had been employed. Not only did the truck have a simpler, more clean-cut look but this was also the beginning of an era where modern

After all of these years of

are in need of some serious

work. Chevy/GMC trucks are

This edition faded from popularity in the early 1980s as a result of falling gas prices and quality issues with diesel fuel suppliers,

giving the cars a bad reputation for dependability and reliability. The 6.2L appeared in 1982 and the 6.5L in 1992, as the focus for diesel applications shifted from cars to light trucks. These
