an IP phone for development purposes Get the most out of your IP phone systems with strategies and solutions direct from the Cisco team Services on Cisco IP Phones help you enhance productivity, gain the competitive advantage, and even help generate revenue. Services are simply applications that run on the phone rather than on a PC or a web browser. By developing services tailored to your particular needs, you can achieve unlimited goals. Cisco AVVID IP Telephony provides an end-to-end voice-over-IP solution for enterprises. Part of that solution are Cisco IP Phones, a family of IP-based phones. Cisco IP Phones feature a large display, an XML micro browser capable of retrieving content from web servers, and the ability to deploy custom services tailored to your organization's or enterprise's needs. Developing Cisco IP

Phone Services uses detailed code samples to explain the tools and processes used to develop custom phone services. You'll learn about XML, CallManager, Cisco IP Phones, and the history behind why Cisco chose XML to deploy phone services. You'll find detailed information to help you learn how to build a service, how to build a directory, and how to integrate your service with Cisco CallManager. This book complements and expands on the information provided in the Cisco IP Phone Services Software Developer's Kit (SDK). With the information in this book, you can maximize your productivity using the tools provided in the SDK and the custom tools provided on the companion CD-ROM. Beginner and advanced service developers alike benefit from the information in this book. Developing Cisco IP Phone
