Engineering, Medical, Chartered Accounting and Law are a few professions that are considered to be good for one ' s status, salary and other perquisites. But, just managing one ' s admission into professional institutions does not make a person successful professionally. This book has eleven levels. The first five levels explain what engineering is and how one can become a successful professional, for which parents and teachers should contribute significantly. The rest of book takes a civil engineer working on projects like roads, bridges, dams, seaports, airports, industrial and residential buildings etc. on an innovative and interesting professional journey. It explains in minute detail, with examples of possible challenges and solutions for them, covering as many tasks as possible. The construction of major projects has been explained in simple language that best suits a classroom setting.

Herb Johnson believes that we are meant to live abundantly. We are designed to live the good life, with the freedom and creativity to follow our passions. What will defeat us is an attitude of impoverishment—the belief that we are undeserving, so why should we try. In Engineering Business Success, Johnson explores the structure of success. Many books overflow with detail about business systems—important, yes, but they don ' t reveal the big picture of what it takes to succeed. What fundamentally must be in place to open and effectively operate a successful business? As an engineer and as a businessperson, Johnson has written an important resource for both. But his book is for anyone who wants to make something of himself or herself, because the themes here are central to winning. Business opportunities abound in our society, and Johnson shows you what you should be looking for, and what needs to be in place if you are to win. So many businesses fail right out of the gate, and Johnson has the antidote so that it won ' t happen to you. Foremost, he says, you need to seize the responsibility to serve— to serve your industry, your clients, and your stakeholders. That is the underpinning of success. In Engineering Business Success, Herb Johnson shares what he has learned in his 28 years at the helm of the thriving company that he founded. And he shares what he has learned in life, since his boyhood rural upbringing, through his years as a young engineer, and as he has worked to make the most of his business. Johnson ' s story demonstrates the trajectory of following one ' s passion—and doing so with the spirit of service and with the business savvy that he has learned along the way. " Herb embraces an attitude of abundance, a dedication to discipline, and commitment for lifetime learning, all of which pour forth from this story of his entrepreneurial journey. Business owners, and those wishing to experience the freedoms Herb has enjoyed, will get a dose of enthusiasm and pick up some helpful hints from reading this book. " —VERNE HARNISH, FOUNDER, ENTREPRENEURS ' ORGANIZATION AND GAZELLES AUTHOR OF SCALING UP AND MASTERING THE ROCKEFELLER HABITS

Save schedule time and cost by utilizing SketchUp and Information Modeling and Organization for civil engineering projects in the heavy construction industry This comprehensive guide showcases an easy to follow workflow methodology for incorporating SketchUp in day-to-day activities during the design and construction phases of civil engineering projects. The book concentrates on the idea of Information Modeling and Organization for projects from the heavy construction industry with richly illustrated and highly detailed real-world examples. SketchUp for Civil Engineering and the Heavy Construction Industry: Modeling Workflow and Problem Solving for Design and Construction explores the efficient way to convert 2D construction plans into a 3D model that can be used for planning, clash detection (problem identification prior to start of construction), field guidance, work plan creation and visualization support during meetings. The reader will become familiar with the following: Introduction to Information Modeling and Organization Introduction to report generation based on the concept of information modeling SketchUp core tools, supplementary applications, menus, properties and many other aspects of the software 3D modeling of bridge components, terrain modeling, utilization of survey data for 3D models, utilization of CAD files for the purpose of 3D modeling, and more Workflow examples for creation of 3D models for clash detection purposes by

incorporating different components (rebar, post-tensioning, drainage system, fire suppression system, girders, formwork, etc.) Creation of dynamic components, especially useful for construction equipment Utilization of SketchUp models for field management use, file sharing, revisions, and more Introduction to styles and how to make your 3D models intriguing
