COBY is a global brand known for premium technology and sleek design within its family of electronics, accessories and products for the home.

In an age when students come to class with more varied music listening preferences and experiences than ever before, music educators can find themselves at a loss for how to connect with their students. *Listening in Action* provides the beginnings of a solution to this problem by characterizing students' contemporary music listening experiences as they are mediated by digital technologies. Several components of contemporary music listening experiences are described, including: the relationship

between music listening experiences and listener engagements with other activities; listener agency in creating playlists and listening experiences as a whole; and the development of adolescent identities as related to the agency afforded by music listening devices. The book provides an accessible introduction to scholarship on music listening across the disciplines of musicology, ethnomusicology, sociology of music, psychology of music, and music education. By reading *Listening in Action*, music educators can gain an understanding of recent theories of music listening in everyday life and how those theories might be applied to bridge the gap between music pedagogies and students who encounter music in a heavily mediated, postperformance world.

With contributions from an international group of authors with diverse

backgrounds, this set comprises all fourteen volumes of the proceedings of the 4th AHFE Conference 21-25 July 2012. The set presents the latest research on current issues in Human Factors and Ergonomics. It draws from an international panel that examines cross-cultural differences, design issues, usability, road and rail transportation, aviation, modeling and simulation, and healthcare.

This volume discusses pleasurable design — a part of the traditional usability design and evaluation methodologies. The book emphasizes the importance of designing products and services to maximize user satisfaction. By combining this with traditional usability methods it increases the appeal of products and use of services.

CROSSCURRENTS: CULTURES, COMMUNITIES, TECHNOLOGIES is a combined print and online text/webtext designed to provide readings and activities that allow students not only to critically examine mass culture and the media that circulates it but also to engage rhetorically with electronic communication, presentation, and web-authoring and digital imaging technologies.

CROSSCURRENTS is available as a full-color printed text and as an electronic text with additional links to YouTube and websites chosen by the authors to extend the conversation and learning experience. **CROSSCURRENTS** represents the first in a new generation of texts that doesn't make instructors choose between teaching traditional rhetorical concerns and helping students develop as writers and readers of electronic media.
