Unleash powerful teaching and the science of learning in your classroom **Powerful Teaching: Unleash the Science of Learning** empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute—without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With **Powerful Teaching**, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective Develop tools to share the science of learning with students and parents, ensuring success inside and outside the classroom **Powerful Teaching: Unleash the Science of Learning** is an indispensable resource for educators who want to take their instruction to the next level. Equipped with scientific knowledge and evidence-based tools, turn your teaching into powerful teaching and unleash

Pathways to Personalization offers an innovative five-step framework to help school leaders and teacher teams design and implement blended and personalized learning initiatives based on local needs and interests. The book draws on principles of improvement science and change management, as well as work in nearly five hundred classrooms, to help educators define their own rationale for personalized learning; it guides them as they establish small pilot initiatives, determine criteria for success, evaluate their efforts, and create a path for replication and scale. Filled with activities and templates for organizing information and student feedback, the book also includes many examples of how district leaders, school principals, and teachers have successfully navigated the change process to create more student-centered classrooms. Shifting a school or district to offer more personalized learning requires a great deal of commitment, passion, and energy, but it also demands a strategic process. Pathways to Personalization meets this need by providing a field-tested road map for educators seeking ways to meet the academic and emotional needs of all students, and to empower them to take charge of their own learning.
