WASSCE / WAEC English May / June 2007 Paper 1 (Essay) 2007: NG: Make a difference now. We ' re always striving to provide a better user experience on Larnedu and this includes providing high quality resources to help every student out there. The best part is that we do this without requesting for a dime most of the time.

WASSCE / WAEC English Language Past Questions

The paper 2 exam states that your answer in this section should be approximately 400-450 words in length and you must write in standard English, although you may use dialect in conversations. (As a side note: I have seen short stories twice this length win the CXC CSEC English A short story award!)

This important new volume advances current role theory scholarship, offering concrete theoretical suggestions of how foreign policy analysis and IR theory could benefit from a closer integration of role theory. It will be of great interest to all scholars and students of international relations, foreign policy and international politics.

Performance assessment is a hot topic in school systems, and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policymakers have had to dig to find out what we know and what we still have to learn about performance assessment. Beyond the Bubble Test: How Performance Assessments Support 21st Century Learning synthesizes the latest findings in the field, and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem-solving are not achieved when we teach to multiple-choice exams. Examples in Beyond the Bubble Test paint a useful picture of how schools can begin to supplement traditional tests with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what ' s possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, bring together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. Beyond the Bubble Test situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks

beyond our U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us.

This volume reports research that informs the development of reading and listening assessment in IELTS. This volume brings together a set of eight IELTS-related research studies - four on reading and four on listening - conducted between 2005 and 2010. Findings from these studies provide valuable evidence on the validity, reliability, impact and practicality of the IELTS test; they are also instrumental in highlighting aspects needing attention, and thus directly inform the continuing evolution of the IELTS reading and listening tests. The volume reviews and comments on the specific contribution of each study to the ongoing process of IELTS reading and listening test design and development.

The Chinese Army Today is a comprehensive study of the Chinese military, examining its ground forces in a level of detail not found in any other contemporary works. This new, revised edition has been fully updated to take account of recent changes in the institution. In 1999, the military modernization program of the Chinese People ' s Liberation Army increased in intensity and achieved a focus not seen in the previous two decades. Based primarily on actual Chinese sources, this book details these changes and puts them in the context of the many traditions that still remain. Written by a retired professional military officer who has served in China, the text uses first-hand observation of the Chinese military and three decades of military experience to weave many disparate threads from official Chinese statements, documents, and media reports into an integrated whole. The author also conducts an in-depth exploration into the many forces that constitute the People ' s Liberation Army. This is an essential book for all students of Chinese military and security affairs, and highly recommended for students of Chinese Politics, Asian Security, and International Relations and Strategic Studies, in general.

"The only resource of its kind, the Guide to Canadian English Usage, Second Edition, provides Canadians with straightforward, authoritative guidelines for using the language as it is written and spoken in their own country. Comprehensive and reliable, the guide is an essential reference for any writer or speaker of English in Canada."--BOOK JACKET.

Katherine Baird, an economist, clearly spells out how our educational system is trapped in mediocrity. She points the direction to where we need to go to get out of the trap and carefully examines each factor that has led to the current state in education.

The impact of energy on global security and economy is clear and profound, and this is why in recent years energy security has become a source of concern to most countries. However, energy security means different things to different countries based on their geographic location, their endowment of resources their strategic and economic conditions. In this book, Gal Luft and Anne Korin with the help of twenty leading experts provide an overview of the world's energy system and its vulnerabilities that underlay growing concern over energy security. It hosts a debate about the feasibility of resource conflicts and covers issues such as the threat of terrorism to the global energy system, maritime security, the role of multinationals and non-state actors in energy security, the pathways to energy security through diversification of sources and the development of alternative energy sources. It delves into the various approaches selected producers, consumers and transit states have toward energy security and examines the domestic and foreign policy tradeoffs required to ensure safe and affordable energy supply. The explains the various pathways to energy security and the tradeoffs among them and demonstrates how all these factors can be integrated in a larger foreign and domestic policy framework. It also explores the future of nuclear power, the complex relations between energy security and environmental concerns and the role for decentralized energy as a way to enhance energy security.

Analyzing twenty-first century innovations in global health governance, this volume addresses questions of pandemics, essential medicines and disease eradication through detailed case studies of critical and rapidly spreading infectious diseases such as HIV/AIDS and SARS and 'lifestyle' illnesses such as tobacco-related illnesses, all of which are at the centre of the current global health challenge. Given its contemporary focus and wide range of world leading experts, this study is highly suitable for courses on global governance generally and global public health specifically across political science, economics, law, medicine, nursing and related fields. Scholars, practitioners and clinicians seeking a context for their front line health care provision will find this volume invaluable.
