Responses to flag burning as a particular form of street protest tend to polarize into two camps: one holding the view that action of this sort is constitutionally protected protest, the other, that it is subversive and criminal activity. In this well-researched and richly documented volume, Welch examines the collision of these ideologies, and shows the relevance of sociological concepts to a deeper understanding of such forms of protest. In exploring social control of political protest in the United States, this volume embarks on an in-depth examination of flag desecration and efforts to criminalize that particular form of dissent. It seeks to examine the sociological process facilitating the criminalization of protest by attending to moral enterprises, civil religion, authoritarian aesthetics, and the ironic nature of social control. Flag burning is a potent symbolic gesture conveying sharp criticism of the state. Many American believe that flag desecration emerged initially during the Vietnam War era, but the history of this caustic form of protest can be traced to the period leading up to the Civil War. The act of torching Old Glory differs qualitatively from other forms of defiance. With this distinction in mind, attempts to penalize and deter flag desecration transcend the utilitarian function of regulating public protest. Despite popular claims that American society is built on genuine consensus, the flag-burning controversy brings to light the contentious nature of U.S. democracy and its ambivalence toward free expression. The First Amendment of the U.S. Constitution is often viewed as one of the more unpopular additions to the Bill of Rights. One constitutional commentator underscores this point by noting that the First Amendment gives citizens the right to tell people what they do not want to hear. Flag Burning is a well-written, informative volume suitable for courses in deviance, social problems, social movements, mass communication, criminology, and political science, as well as in sociology of law and legal studies.

The work of Stanley Cohen over four decades has come to acquire a classical status in the fields of criminology, sociology and human rights. His writing, research, teaching and practical engagement in these fields have been at once rigorously analytical and intellectually inspiring. It amounts to a unique contribution, immensely varied yet with several unifying themes, and it has made, and continues to make, a lasting impact around the world. His work thus has a protean character and scope which transcend time and place. This book of essays in Stanley Cohen's honour aims to build on and reflect some of his many-sided contributions. It contains chapters by some of the world's leading thinkers as well as the rising generation of scholars and practitioners whose approach has been shaped in significant respects by his own.

Packed with new examples and material, this second edition provides fully up-to-date exploration of the genesis, dynamics, and demise of moral panics and their impacts on the societies in which theytake place. Packed with updated and recent examples including terrorism,the 9/11 attack on the World Trade Towers, school shootings, flagburning, and the early-2000s resurgence of the " sexslave " scare Includes a new chapter on the media, currently regarded as amajor component of the moral panic Devotes a chapter to addressing criticisms of the first editions as well as the moral panics concept itself Written by long-established experts in the field Designed to fit both self-contained courses on moral panics andwider courses on deviance

Packed with new examples and material, this second edition provides a fully up-to-date exploration of the genesis, dynamics, and demise of moral panics and their impacts on the societies in which they take place. Packed with updated and recent examples including terrorism, the 9/11 attack on the World Trade Towers, school shootings, flag burning, and the early-2000s resurgence of the " sex slave " scare Includes a new chapter on the media, currently regarded as a major component of the moral panic Devotes a chapter to addressing criticisms of the first edition as well as the moral panics concept itself Written by long-established experts in the field Designed to fit both self-contained courses on moral panics and wider courses on deviance

This three-volume work offers a comprehensive review of the pivotal concepts, measures, theories, and practices that comprise criminology and criminal justice. No longer just a subtopic of sociology, criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology, political science, behavioral science, law, economics, public health, family studies, social work, and many others. The three-volume Encyclopedia of Criminology presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single, authoritative reference work. More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive, international resource. The pivotal concepts, measures, theories, and practices of the field are addressed with an emphasis on comparative criminology and criminal justice. While the primary focus of the work is on American criminology and contemporary criminal justice in the United States, extensive global coverage of other nations' justice systems is included, and the increasing international nature of crime is explored thoroughly. Providing the most up-to-date scholarship in addition to the traditional theories on criminology, the Encyclopedia of Criminology is the essential one-stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field.

Ironies of Imprisonment examines in-depth an array of problems confronting correctional programs and policies from the author's singular and consistent critical viewpoint. The book challenges the prevailing logic of mass incarceration and traces the ironies of imprisonment to their root causes, manifesting in social, political, economic, and racial inequality. Unique and accessible, this book promises to stimulate spirited discussion and debate over the use of prisons.

The Ashgate Research Companion to Moral Panics offers a comprehensive assemblage of cutting-edge critical and theoretical perspectives on the concept of moral panic. All chapters represent original research by many of the most influential theorists and researchers now working in the area of moral panic, including Nachman Ben-Yehuda and Erich Goode, Joel Best, Chas Critcher, Mary deYoung, Alan Hunt, Toby Miller, Willem Schinkel, Kenneth Thompson, Sheldon Ungar, and Grazyna Zajdow. Chapters come from a range of disciplines, including media studies, literary studies, history, legal studies, and sociology, with significant new elaborations on the concept of moral panic (and its future), informed and powerful critiques, and detailed empirical studies from several continents. A clear and comprehensive survey of a concept that is increasingly influential in a number of disciplines as well as in popular culture, this collection of the latest research in the field addresses themes including the evolution of the moral panic concept, sex panics, media panics, moral panics over children and youth, and the future of the moral panic concept.

This study provides a comprehensive critique - forensic, historical, and theoretical - of the moral panic paradigm, using empirically grounded ethnographic research to argue that the panic paradigm suffers from fundamental flaws that make it a myth rather than a viable academic perspective.

In Punishment in America Michael Welch gathers together his seminal contributions to the most crucial and controversial issues in criminal justice. Topics range from the war on drugs, boot camps and institutional violence, to AIDS and HIV, capital punishment and the entire corrections industry. This coherent, but critical vision of punishment and corrections emphasizes social control but takes account of key social forces such as politics, religion and morality.
