Drake Fields and Streams: Stream Restoration, Neoliberalism, and the Future of Environmental Science Rebecca Lave Reviewed by Eric Nost Southeastern Geographer is published by UNC Press for the Southeastern Division of the Association of American Geographers (www.sedag.org). The quarterly journal publishes the academic work of geographers and other social and physical scientists, and features peer-reviewed articles and essays that reflect sound scholarship and contain significant contributions to geographical understanding, with a special interest in work that focuses on the southeastern United States.

Interest in Arctic politics is on the rise. While recent accounts of the topic place much emphasis on climate change or a new geopolitics of the region, the history of the Inuit Circumpolar Council (ICC) and Arctic politics reaches back much further in time. Drawing out the complex relationship between domestic, Arctic, international and transnational Inuit politics, this book is the first in-depth account of the political history of the ICC. It recognises the politics of Inuit and the Arctic as longstanding and intricate elements of international relations. Beginning with European exploration of the region and concluding with recent debates over ownership of the Arctic, the book unfolds the history of a polity that has overcome colonization and attempted assimilation to emerge as a political actor which has influenced both Arctic and global governance. This book will be of strong interest to students and scholars of Arctic politics, indigenous affairs, IR theory and environmental politics.

The rise of the West is often attributed the presence of certain features in Western countries from the 16th century that were absent in more traditional societies: the abolition of serfdom and Protestant ethics, the protection of property rights, and free universities. The problem with this reasoning is that, before the 16th century, there were many countries with social structures that possessed these same features that didn't experience rapid productivity growth. This book offers a new interpretation of the 'Great Divergence' and 'Great Convergence' stories. It explores how Western countries grew rich and why parts of the developing world (South and East Asia and the Middle East) did not catch up with the West from 1500 to 1950 but began to narrow the gap after 1950. It also examines why others (Latin America, South Africa, and Russia) were more successful at catching up from 1500 to 1950, but then experienced a slowdown in economic growth compared to other developing countries. Mixed Fortunes offers a novel interpretation of the rise of the West and of the subsequent development of 'the rest' and China and Russia, important examples of two groups of developing countries, are examined in greater detail.

This edited volume examines the continued viability of international human rights law in the context of growing transnational law enforcement. With states increasingly making use of global governance modes, core exercises of public authority such as migration control, surveillance, detention and policing, are increasingly conducted extraterritorially, outsourced to foreign governments or delegated to non-state actors. New forms of cooperation raise difficult questions about divided, shared and joint responsibility under international human rights law. At the same time, some governments engage in transnational law enforcement exactly to avoid such responsibilities, creatively seeking to navigate the complex, overlapping and sometimes unclear bodies of international law. As such, this volume argues that this area represents a particular dark side of globalisation, requiring both scholars and practitioners to revisit basic assumptions and legal strategies. The volume will be of great interest to students, scholars and practitioners of international relations, human rights and public international law.

Mo Stewart is a former healthcare professional, a disabled female veteran and an independent researcher. This book is the culmination of six years of self-funded research and the evidence exposes the influence of corporate America, since 1992, with the future welfare reforms of the UK. The impact of the enforced austerity measures of the UK government is identified, as they negatively affect the welfare and the survival of the chronically sick and disabled population in receipt of welfare benefits when unfit to work. The research has informed welfare reform debates in the House of Lords and the House of Commons since 2011 and contributed to the evidence used by the United Nations to investigate the UK government for breaches of the Human Rights of sick and disabled people. Endorsed by the disabled community and by academics, the research has identified the adoption of lethal social policies, copied from American social security policies, and linked to the death of thousands of the most vulnerable of all, as the UK welfare state is systematically demolished as all planned over thirty years ago by a previous Conservative government.

This book presents a clear overview of the debates that surrounded the making of the 1944 Act, which affected every aspect of education in this country. It gives a detailed account of the tripartite divisions into 'three types of child' that were sanctioned in the reforms of the 1940s. At the same time, it also emphasises the idea of education as a civic project which underlay the reforms and which was such an important part of their lasting authority. The education policies of the past decade and the current attempts to shape a new education settlement need to be interpreted in a long-term historical framework and in particular, in relation to the aims and problems of the last great cycle of reform in the 1940s. This book makes an important contribution to the development of such a framework and the social history of education policy in this country.

The product of more than twenty years of research, first-person observations, discussions, and policy analyses, Nation-Building in the Baltic States: Transforming Governance, Social Welfare, and Security in Northern Europe explores the characteristics of the Baltic states as positioned in the northeast corridor in terms of military strife and polit

Crisis and Response: An FDIC History, 2008 & 2013 reviews the experience of the FDIC during a period in which the agency was confronted with two interconnected and overlapping crises & first, the financial crisis in 2008 and 2009, and second, a banking crisis that began in 2008 and continued until 2013. The history examines the FDIC & s response, contributes to an understanding of what occurred, and shares lessons from the agency & s experience.

The world is getting more violent, and violence is occurring in surprising places. Over the past 15 years, 3.34 billion people, or almost half of the world 's population, have been affected by violence. The number of violent conflicts is decreasing, but conflicts are killing more people: ...

This book is an interdisciplinary examination of China's new urban development model and the challenges Chinese cities face in the 21st century. China is in the midst of a historic developmental inflection point, grappling with a significantly slowing economy, rapidly rising inequality, massive migration, skyrocketing housing prices, alarming environmental problems, and strong pushback from the West. In this volume, Western and Chinese scholars in different disciplines offer the clearest look yet at some of the main challenges China faces, including domestic and international contexts, the new urban development model, inclusion and well-being of migrants and their families, and urban sustainability. This book sheds light on China 's ongoing development and future directions, and has strong policy implications for anyone interested in the future of China.
