Download File PDF Handbook Of Food

The principles of mechanical design and construction of food processing equipment are similar to those for the equipment of the chemical and process industries.

The basic engineering requirements of process equipment are the containment of the material, the strength of the components, the efficiency of the operation, and the transfer of energy during processing.

~~Design and Selection of Food Processing Equipment ...~~

Food processing involves the transformation of raw animal or plant materials into consumer-ready products, with the objective of stabilizing food products by preventing or reducing negative changes in quality. From:
