I talked with a couple shops about my rebuild project and discovered that I knew embarrassingly little about the breadth of options for rebuilding a Harley V-twin. To begin with, all sizes of the Twin-Cam engine, 88, 96 and 103 ci can be rebuilt to 103 and even up to 107ci. Those engines can even be upsized to 110, 117 or even 124 ci, though those larger displacements would have me more often ...

The main problem of the Twin Cam engine of the Harley Davidson is probably it's the design aspect of the cam chain system. The actual design itself is designed poorly. It utilizes plastic shoes "riding" on the cam chains that can and will actually wear out in due time. Even with its brand new hydraulic tensioning system, this problem still exists and is not a lasting fix for the said issue.
