1916. England is at war, and the Morland family is in the thick of it, with two men already in France and three more soon to go. Tragedy strikes Morland Place when Jessie's husband Ned is reported missing on the Western Front. His father launches a desperate bid to find him, but the family fear the worst. Jessie, in mourning and frustrated by her job as an auxiliary nurse, goes to London to work in a military hospital. There she is reunited with her old friend Oliver, posted to the capital under the RAMC. Also in London is Violet, whose affair with the brilliant artist Octavian Laidislaw is about to erupt in scandal . . . The Measure of Days paints a portrait of a family, and a nation, at war, at a pivotal point in history. With the onset of conscription, no one is left unaffected. Every man must hold himself in readiness; and every woman knows that when she says goodbye, it might be for the last time.

This book examines the changing linguistic and cultural identities of bilingual students through the narratives of four Japanese returnees (kikokushijo) as they spent their adolescent years in North America and then returned to Japan to attend university. As adolescents, these students were polarized toward one language and culture over the other, but through a period of difficult readjustment in Japan they became increasingly more sophisticated in negotiating their identities and more appreciative of their hybrid selves. Kanno analyzes how educational institutions both in their host and home countries, societal recognition or devaluation of bilingualism, and the students' own maturation contributed to shaping and transforming their identities over time. Using narrative inquiry and communities of practice as a theoretical framework, she argues that it is possible for bilingual individuals to learn to strike a balance between two languages and cultures. Negotiating Bilingual and Bicultural Identities: Japanese Returnees Betwixt Two Worlds: "is a longitudinal study of bilingual and bicultural identities--unlike most studies of bilingual learners, this book follows the same bilingual youths from adolescence to young adulthood." "documents student perspectives--redressing the neglect of student voice in much educational research, and offering educators an understanding of what the experience of learning English and becoming bilingual and bicultural looks like from the students' point of view; and "contributes to the study of language, culture, and identity by demonstrating that for bilingual individuals, identity is not a simple choice of one language and culture but an ongoing balancing act of multiple languages and cultures. This book will interest researchers, educators, and graduate students who are concerned with the education and personal growth of bilingual learners, and will be useful as text for courses in ESL/bilingual education, TESOL, applied linguistics, and multicultural education.

Sensors for Health Monitoring discusses the characteristics of U-Healthcare systems in different domains, providing a foundation for working professionals and undergraduate and postgraduate students. The book provides information and advice on how to choose the best sensors for a U-Healthcare system, advises and guides readers on how to overcome challenges relating to data acquisition and signal processing, and presents comprehensive coverage of up-to-date requirements in hardware, communication and calculation for next-generation uHealth systems. It then compares new technological and technical trends and discusses how they address expected u-Health requirements. In addition, detailed information on system operations is presented and challenges in ubiquitous computing are highlighted. The book not only helps beginners with a holistic approach toward understanding u-Health systems, but also presents researchers with the technological trends and design challenges they may face when designing such systems. Presents an outstanding update on the use of U-Health data analysis and management tools in different applications, highlighting sensor systems Highlights Internet of Things enabled U-Healthcare Covers different data transmission techniques, applications and challenges with extensive case studies for U-Healthcare systems

The first comprehensive introduction to the thought of Eliséé Reclus, the great anarchist geographer and political theorist, Anarchy, Geography, Modernity presents his groundbreaking critique of all forms of domination: not only capitalism, the state, and authoritarian religion, but also patriarchy, racism, technological domination, and the domination of nature. Not only an anarchist, but also a radical feminist, antiracist, ecologist, animal rights advocate, cultural radical, nudist, and vegetarian, Reclus' ideas are presented both through detailed exposition and analysis and in extensive translations of key texts, most appearing in English for the first time. The work elucidates Reclus' greatest achievement, a sweeping historical and theoretical synthesis recounting the story of the earth and humanity as an epochal struggle between freedom and domination, and his crucial insights on the interrelation between personal and small-group transformation, broader cultural change, and large-scale social organization are also explored.

This volume constitutes the refereed proceedings of the International Conference on Digital Enterprise and Information Systems, held in London during July 20 - 22, 2011. The 70 revised full papers presented were carefully reviewed and selected. They are organized in topical sections on cryptography and data protection, embedded systems and software, information technology management, e-business applications and software, critical computing and storage, distributed and parallel applications, digital management products, image processing, digital enterprises, XML-based languages, digital libraries, and data mining.

A number of high stakes conflicts — over net neutrality, streaming music, copyrights, the shifting fortunes of various media outlets, and divisive politics — continue to unfold over YouTube, Twitter, TV screens, and other mediated feeds. The speed at which these stories are consumed means that understanding the complex connections between the media and our culture is more important than ever. The new tenth edition of Media & Culture starts with the digital world students know and then goes further, focusing on what these constant changes mean to them. As always, Media & Culture brings together industry expertise, media history, and current trends for an exhilarating look at the media right now. Through new infographics, cross-reference pages, and a new digital jobs feature, this edition offers the most contemporary and compelling examinations yet of how the media industries connect, interlock, and converge.

This volume contains a unique selection of chapters covering a wealth of contemporary topics in this ubiquitous and diverse system of cell signaling. It offers much more than the accessibility and authority of a primary text book, exploring topics ranging from the fundamental aspects of calcium signaling to its varied clinical implications. It presents comprehensive discussion of cutting-edge research alongside detailed analysis of critical issues, at the same time as setting out testable hypotheses that point the way to future scientific endeavors. The contributions feature material on theoretical and methodological topics as well as related subjects including mathematical modeling and simulations. They examine calcium signaling in a host of contexts, from mammalian cells to bacteria, fruit fly and zebrafish. With much of interest to newcomers to the field as well as seasoned experts, this new publication is both wide-ranging and authoritative. The chapter "Calcium Signaling: From Basic to Bedside" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Former Marine MacArthur Patton has made a small fortune on top-secret government contracts and black-ops missions, but his new assignment involves something more dangerous—marriage. Well, fake marriage anyway. To keep weapons out of the hands of terrorists, Mac has to secure a fiancée. A sweet, demure, compliant fiancée to serve as his arm candy for a few weeks while he completes the covert arms deal in Mexico. His sister claims to know just the woman, and sends her best friend to play the role. "Sweet" and "demure" aren't in Kelli Landers's repertoire. A badass veterinarian who neuters big dogs and bigger men on a regular basis, she can't wait to bring Mr. Tall-Dark-and-Detached to his knees. Her longtime crush on the commitment-phobe makes her plan to seduce him even sweeter. Love wasn't part of the plan, but the deeper Mac and Kelli fall into their ruse, the more danger they attract, until more than just their hearts are on the line... Each book in the Front and Center series is a standalone, full-length story that can be enjoyed out of order. Series Order: Book #1 Marine for Hire Book #2 Fiancée for Hire Book #3 Best Man for Hire Book #4 Protector for Hire
