More than just a pair of days, a weekend is also a state of mind—a feeling of relaxation and freedom to immerse ourselves fully in a favorite activity. In Weekend Sewing, designer Heather Ross presents creative projects for clothing, accessories, and home items that can be made in a weekend or less. Some, like the Quick Garden Gloves and Ruby's Bloomers, take a few hours; others, like the Weekend-Away Travel Bag and Trapeze Sundress, require a day or two—but all of them capture that weekend feeling. And because weekends are often the most fun when they're social, Ross features ideas that encourage us to share our stitching and our time, such as a recipe for soup to simmer while sewing, then serve to guests later in the day, and tips for transporting a sewing machine to a friend's house for an afternoon of social stitching. The sewing instructions are beautifully illustrated.

The sections include general as well as domain-specific principles of learning that have been found to play a significant role in technology-enhanced environments, ways to shape the environment to optimize learners' interactions and learning, and specific technologies used by the environment to empower learners. An additional section discusses the work presented in the preceding sections from a computer science perspective and an implementation perspective. This book comes out of the work in Kaleidoscope: a European Network of Excellence in which over 1,000 people from more than 90 institutes across Europe participate. Indulge in your favorite hue (or two!) with fabric designer Jessica Levitt. Bright and bold quilt blocks pair same-color prints with strong solids for depth and lots of personality. Stitch random-width strips to a muslin base for a planned approach to improv. Giant-size blocks join together like a fun puzzle, forming a graphic secondary pattern when you piece the quilt top!
