Use the serial number on the generator set plate when ordering parts or in correspondence.

Active Listening, Second Edition, is grounded in the theory that learners are more successful listeners when they activate their prior knowledge of a topic. Teacher's Manual 3 contains step-by-step practical teaching notes, optional speaking activities and listening strategies, culture notes, and suggested times for completing lessons. Photocopiable unit quizzes, two complete tests with Audio CD, and complete answer keys are also included.

Award-winning photographer and accomplished instructor Andy Long provides a comprehensive guide to photographing the Aurora Borealis. It, readers will learn everything they need to know about photographing this phenomenon—along with some very special techniques designed to help kick their image-making up to the next level. Long covers all the details from simply understanding the aurora and

figuring out when and where to shoot, to picking the right gear to maximize your success, to processing your digital files after the shoot too maximize your results. You'll learn how to capture the moon, star trails, and Milky Way in your images of the aurora—and even how to produce dazzling time-lapse images. Also covered are practical matters, like coping with long, cold, night-time shoots (and the equipment problems that can accompany them) and optimizing camera settings to reduce noise, maximize detail, and enhance/downplay lens distortion.

Numerous years back while leading an Alaska brown bears workshop, Andy saw some books of aurora borealis images. He was hooked and a winter trip to Alaska to photograph the incredible beauty presented on the pages of those books was soon to follow. Ever since his initial scouting trip he has been leading workshops yearly to the far north to let others see, experience and photograph this amazing phenomenon. While his true love is wildlife, Andy will tell you his favorite thing to see and photograph is the northern lights. His passion of teaching others about the aurora can now reach more people through this book. Come take a journey to see some beautiful shots of the aurora and learn how you can take shots like this when (not if) offered the chance to visit an area where the sky comes alive with color. When you want to experience this, visit Andy's website and sign up for a northern lights workshop and let him take you to the best spots possible and personally teach you.

Jo and Ade spent over three fantastic years crusing the Big U in a 43' Selene Trawler, Wandering Star. Besides having fun, their vision was to demonstrate that you don't have to cross oceans and go around the world to have the incredible adventure of a lifetime.
