This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques. A preliminary section defines active learning and looks at the current climate surrounding the concept. A second section, entitled "The Modified Lecture" offers ways that teachers can incorporate active learning into their most frequently used format: the lecture. The following section on classroom discussion explains the conditions and techniques needed for the most useful type of exchange. Other ways to promote active learning are also described including: visual learning, writing in class, problem solving, computer-based instruction, cooperative learning, debates, drama, role playing, simulations, games, and peer teaching. A section on obstacles to implementing active learning techniques leads naturally to the final section, "Conclusions and Recommendations," which outlines the roles that each group within the university can play in order to encourage the implementation of active learning strategies. The text includes over 200 references and an index. (JB)

The Sailing Master-Book Two: The Long Passage Readers will happily yield to the spell cast by Book Two without having to first read Book One! Conflict. Love. Commitment & Betrayal . . . all abound in this intrepid novel of the sea set in the Golden Age of Sail. The looming shadow of the Napoleonic War dims the waning glow of the Enlightenment, yet Owen Harriet's heartfelt narrative provides insight into the human condition. And an overarching question emerges . . . is this chronicle simply the story of a man, or of an entire age? From the opening broadside at the Battle of the Nile to the ironic conclusion off Ushant, Owen continues to come of age, maintaining a steadfast relationship with his beloved mentor, Ignatius Comet Lau, HMS Eleanor's esteemed Sailing Master. Deep within French Indochina. Lost on the Mekong River. Owen befriends an inscrutable boy monk, only to fall prey to a demonic French privateer. A powerful enigma continues to haunt Owen and he begins to understand. A premonition of unknown origin? An Oracle? Or a remnant calling from his own childhood imagination.

As our knowledge of the human body becomes ever more exact, scientists have made remarkable leaps forward in many fields. Yet for one question that many of us would like

answered--What causes the body to burn fat?--we find all sorts of confusing claims. Since we know so much about how our body works, can't science tell us the answer? As it turns out, science already has. I have spent over ten years reading thousands of fat-loss studies. Not theories promoted by diet gurus. Only the proven data. My investigation uncovered all kinds of scientific findings: - Studies stating how certain foods cripple our ability to burn fat - Scientists showing how to burn fat while eating more food - Researchers revealing how to get all the benefits of traditional exercise in a tenth of the time - Physiologists finding out how eating less sets us up to gain fat in the long run - Doctors discussing how a few minutes of a new form of exercise immunizes us against fat gain - Endocrinologists explaining how we fix the underlying condition causing us to gain fat We deserve to know the proven facts about fat loss, but who has time to read tens of thousands of pages of scientific studies? The study took me more than a decade. It should not take you that long because the facts have been summarized in this book. They have also been simplified, so anyone who wants to lose weight can understand them. Make no mistake. Tons of clinical studies have shown the best way to trim off those unwanted pounds. It is time to stop listening to marketing myths about how to lose weight. We tried it. It failed. It is time to move on to a smarter science of slim. Proven and practical. Dr. Theodoros Kelesidis Harvard & UCLA Medical Schools The latest and best scientific research. Dr. John J. Ratey Harvard Medical School An important piece of work. Dr. Anthony Accurso Johns Hopkins Smart and health promoting. Dr. JoAnn E. Manson Harvard Medical School The last diet book you will ever need to buy.
