The second edition continues to familiarize the students with the basic principles and techniques of human resource management. Comprehensively, this textbook highlights the importance of effective management of human resources which results not only in organisational effectiveness but also sustainable competitive advantage. With the coverage of contemporary topics such as HR Scorecard, Gen-Y Employees and Work-life Balance, it keeps the students abreast with the current human resource practices of the real world. This textbook caters to the requirements of management students and is also a useful resource for HR professionals.

Taking a broad approach from career counselling theory to recommendations of major sources of career and job information, this book, first published in 1992, covers subjects such as cooperative programs between librarians, career planning professionals, and job search counsellors and the evaluation of career-related materials. It emphasizes the constant demand for career and job information regardless of economic conditions. Librarians can act as intermediaries to help patrons locate career and employment sources dispersed throughout the collection, demonstrate their proper use, and guide them to additional useful sources. Specific chapters explain how to expand career and job services by networking with other community resources and developing a strong core collection of the best resources available. Other ground breaking topics analysed include employment and labour market trends for the 1990s, unemployment services in libraries, evaluation criteria for career resources, essential career planning and employment materials, specialized collections for relocation literature, and employment of persons with disabilities.
