A Colour Atlas Of Human Anatomy by Robert M.H. McMinn

This is a revised and redesigned second edition of McMinn's "A Colour Atlas of Human Anatomy", first published in 1977. This edition retains many of the original features - all structures are life-size, and the work contains not only dissections but bones, surface anatomy and radiographic material from the skull to the feet, including the brain. New features include 125 new photographs, 80 new dissections to replace some of the older museum examples, a new labelling system, more up-to-date ...
