Miller Test Prep's study guide for the ATI TEAS 6 exam is the solution for students who want to maximize their score and minimize study time. Our study guides are carefully designed to provide only that clear and concise information you need. That's precisely why we put "Clear & Concise" on our cover. The standard for the study guide industry is to "throw in the kitchen sink" when it comes to making a book, meaning you are stuck with hundreds of pages of repetitive information, redundant and confusing examples, and more practice questions than any person could be expected to work through. This results in students feeling overwhelmed, leading to reduced self-confidence, which leads to lower scores! Instead, Miller Test Prep has worked specifically with tutors. Why tutors you ask? Tutors specialize in helping students comprehend information that has already been presented by a teacher. That means they see time and again what students struggle with and what actually works to help them. They specialize in helping students who have previously failed, to succeed. We compiled their decades of experience helping students just like you into this study guide, so you pass the TEAS 6 first time.

Nursing pharmacology is a class that nurses are required to take before they receive their licenses. The course teaches nurses how various drugs interact in a patient's body and allows these professionals to administer drugs and educate patients on their medications. Nurses can gain an understanding of the medications that they must use on their patients as they are healing. They can use their knowledge to discuss side effects that certain drugs have and make suggestions on how patients can minimize them. Nurses also learn about the toxicity of drugs and may suggest adjustments when drugs are causing a negative reaction in patients.
