There was much popular support for Hitler's regime in Nazi Germany, and little widespread domestic opposition or resistance. However, a number of individuals and small groups, from all sections of society, did engage in acts of public defiance or resistance against the regime. This opposition came from the Christian churches; communists, socialists and industrial workers; conservative groups; elements within the army; students and the German youth; and Jews. This book looks at the nature of this opposition and the historical debate surrounding it.

Rather than being accepted by all of German society, the Nazi regime was resisted in both passive and active forms. This re-issued volume examines opposition to National Socialism by Germans during the Third Reich in its broadest sense. It considers individual and organized nonconformity, opposition, and resistance ranging from symbolic acts of disobedience to organized assassination attempts, and looks at how disparate groups such as the Jewish community, churches, conservatives, communists, socialists, and the military all defied the regime in their own ways.

Between 1933 and 1945, more than 500,000 German citizens resisted the Nazi government. Many were imprisoned for political crimes which included both active attempts to remove Hitler from office and passive attempts to oppose the Nazi regime. Resistance was found among university students, churches and even in the German military. This fascinating and compelling history of the German resistance covers groups and methods from underground newspapers such as "Rote Kapella" and "Internal Front" to conspiracy movements within the army, that culminated with Operation Valkyrie, a coup d'état and assassination attempt which went terribly wrong.

Carl Goerdeler was for a long time more than anyone else at the centre of the conspiracy against tyranny; he was in immediate personal contact with almost all of the groups and parties—and not only as a tirelessly active director and recruiting officer for the movement, but at the same time as its most productive mind when it came to working out comprehensive and mature plans dealing with both foreign and domestic problems. The German Resistance movement in its entirety can be surveyed very clearly from the vantage point of his biography. And conversely his biography is of historical significance only in the framework of this general setting. His work can be correctly estimated only when it is constantly compared with that of his colleagues. The history of the German resistance movement has hitherto been written predominantly in the form of a justification and defence against its critics, accusers, and apostates. Not infrequently it has acquired something of the flavour of a gallery of heroes or even of the lives of saints. We are here attempting something else; namely, to attain, by a critical and sober study, a grasp of the historical truth, and beyond this to search our own hearts with a new understanding. For this purpose it was indispensable to depict the German Resistance movement against the background of international politics, so far as relevant sources are now available. Likewise, the development of the movement's ideals of freedom and plans for reform had to be traced back into the time of the Weimar Republic. And finally, its development and the political attitude of its leaders needed to be appreciated in terms of the internal and external history of Hitler's Reich.

Between 1933 and 1945, more than 500,000 non-Jewish German civilians were imprisoned for so-called political crimes. Most of the resistance was, therefore, underground--within the religious, political, civilian, and even military communities. This history of the various segments of the German resistance movement covers groups and methods from underground newspapers--Rote Kapella, Internal Front, The Opponent, The Front Line--to conspiracy movements within unions. While emphasizing the active plots to either arrest or assassinate Hitler, the work embraces also the passive resistance seen in the Protestant and Catholic churches, the Kreisau Circle, trade unions, the foreign ministry and the civil service. The opposition's planned coup d'etat of 1938 is fully detailed, as well as the deep involvement of the Abwehr (military intelligence) in the plots against Hitler.

Looks at how a pastor and a lawyer both resisted the Nazi regime from within, how they did so and the price they paid for their honorable actions.

This book by Detlev Peukert is a survey of the complex experiences and attitudes of ordinary German people between 1933 and 1945. It records how people lived during this period, how they evaded or accepted the regime's demands, and where they positioned themselves along the spectrum between the front lines, side lines, and firing lines.

This is a truly unique account of Nazi Germany at war and of one man's struggle against totalitarianism. A mid-level official in a provincial town, Friedrich Kellner kept a secret diary from 1939 to 1945, risking his life to record Germany's path to dictatorship and genocide and to protest his countrymen's complicity in the regime's brutalities. Just one month into the war he is aware that Jews are marked for extermination and later records how soldiers on leave spoke openly about the mass murder of Jews and the murder of POWs; he also documents the Gestapo's merciless rule at home from euthanasia campaigns against the handicapped and mentally ill to the execution of anyone found listening to foreign broadcasts. This essential testimony of everyday life under the Third Reich is accompanied by a foreword by Alan Steinweis and the remarkable story of how the diary was brought to light by Robert Scott Kellner, Friedrich's grandson.
