While conceptual art is generally identified by its use of language, this book makes clear exactly how language was used. From the bestselling author of THE CHRONICLES OF ST MARY'S. Life is good for Team Weird, now heroes and fully fledged Time Police officers. Luke can't wait to bear arms. Jane has a date. And Matthew still hasn't had his hair cut. But Time waits for no one and neither do criminal masterminds. A major threat to the Timeline is looming, one far deadlier than mere idiots who want to change history. And when a familiar face becomes a Very Important Lead, will conflicting family loyalties spell trouble for Team Weird? One missing. One guilt-ridden. And one facing the end of their Time Police career before it's even begun. Not so good then, after all. FOR FANS OF DOCTOR WHO, THE THURSDAY MURDER CLUB AND JASPER FFORDE. Readers love the Time Police: 'This got five stars only because I couldn't give it six!' 'I don't think I've ever laughed out loud so much reading a book' 'I am always gutted when I finish a Jodi Taylor book as I know I will have to wait for the next one' 'Joyous, breakneck-speed adventures' 'Lots more in this series please' 'This book is BRILLIANT' 'Brilliantly conceived and flawlessly written'

This open access book sets out the stress-system model for functional somatic symptoms in children and adolescents. The book begins by exploring the initial encounter between the paediatrician, child, and family, moves through the assessment process, including the formulation and the treatment contract, and then describes the various forms of treatment that are designed to settle the child's dysregulated stress system. This approach both provides a new understanding of how such symptoms emerge -- typically, through a history of recurrent or chronic stress, either physical or psychological -- and points the way to effective assessment, management, and treatment that put the child (and family) back on the road to health and well-being.
