Take home packs and Soundwaves answers ... - Year 5 Room 24

1. Describe how a vibrating object produces sound waves. (2 marks) Sound is produced by vibrating sources placed in a medium. When the object (e.g. ruler or tuning fork) vibrates, a series of compressions (high air pressure) and rarefactions (low air pressure) are produced by shifting of air layers. In doing so, a longitudinal wave is produced.
