The Lord of Opium delivered me right back into the world of (former) clone, Matteo Alacran, without skipping a beat and continued to take over my own life until the ending. In *Lord of Opium*, we revisit the vast country of Opium and all the characters that make Famer's stories so interesting. Only now, it all belongs to Matteo.

As the teenage ruler of his own country, Matt must cope with clones and cartels in this “ electric blend of horrors and beauty ” (Publishers Weekly), the riveting sequel to the modern classic House of the Scorpion, winner of the National Book Award, a Newbery Honor, and a Printz Honor. Matt has always been nothing but a clone—grown from a strip of old El Patron ' s skin. Now, at age fourteen, he finds himself suddenly thrust into the position of ruling over his own country. The Land of Opium is the largest territory of the Dope Confederacy, which ranges on the map like an intestine from the ruins of San Diego to the ruins of Matamoros. But while Opium thrives, the rest of the world has been devastated by ecological disaster—and hidden in Opium is the cure. And that isn ' t all that awaits within the depths of Opium. Matt is haunted by the ubiquitous army of eejits, zombielike workers harnessed to the old El Patron ' s sinister system of drug growing—people stripped of the very qualities that once made them human. Matt wants to use his newfound power to help, to stop the suffering, but he can ' t even find a way to smuggle his childhood love, Maria, across the border and into Opium. Instead, his every move hits a roadblock, some from the enemies that surround him...and some from a voice within himself. For who is Matt really, but the clone of an evil, murderous dictator? Is his true destiny

already predetermined by his genes?

In 2137, 14-year-old Matt is stunned to learn that, as the clone of old El Patron, he is expected to take over as leader of the corrupt drug empire of Opium, where there is also a hidden cure for the ecological devastation facing the rest of the world.

Matt is six years old when he discovers that he is different from other children and other people. To most, Matt isn't considered a boy at all, but a beast, dirty and disgusting. But to El Patron, lord of a country called Opium, Matt is the guarantee of eternal life. El Patron loves Matt as he loves himself - for Matt is himself. They share the exact same DNA. As Matt struggles to understand his existence and what that existence truly means, he is threatened by a host of sinister and manipulating characters, from El Patron's power-hungry family to the brain-deadened eejits and mindless slaves that toil Opium's poppy fields. Surrounded by a dangerous army of bodyguards, escape is the only chance Matt has to survive. But even escape is no guarantee of freedom... because Matt is marked by his difference in ways that he doesn't even suspect.

After Jack becomes apprenticed to a Druid bard, he and his little sister Lucy are captured by Viking Berserkers and taken to the home of King Ivar the Boneless and his half-troll queen, leading Jack to undertake a vital quest to Jotunheim, home of the trolls.

From the bestselling author of *The Ascent of Money* and *The Square and the Tower* Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or "killer applications"—competition, science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

The crowning volume of Newbery Honor author Farmer's trilogy that began with "The Sea of Trolls" and continued with "The Land of Silver Apples." Impeccably researched and blending the lore of Christian, Pagan, and Norse traditions, this expertly woven tale is beguilingly suspenseful and, ultimately, a testament to love.

This modern classic takes on an iron-fisted drug lord, clones bred for their organs, and what it means to be human. Winner of the National Book Award as well as Newbery and Printz Honors. Matteo Alacrán was not born; he was harvested. His DNA came from El Patrón, lord of a country called Opium—a strip of poppy fields lying between the United States and what was once called Mexico. Matt's first cell split and divided inside a petri dish. Then he was placed in the womb of a cow, where he continued the miraculous journey from embryo to fetus to baby. He is a boy now, but most consider him a monster—except for El Patrón. El Patrón loves Matt as he loves himself, because Matt is himself. As Matt struggles to understand his existence, he is threatened by a sinister cast of characters, including El Patrón's power-hungry family, and he is surrounded by a dangerous army of bodyguards. Escape is the only chance Matt has to survive. But escape from the Alacrán Estate is no guarantee of freedom, because Matt is marked by his difference in ways he doesn't even suspect.

“ Like the druidic life force Jack taps, this hearty adventure, as personal as it is epic, will cradle readers in the ‘ hollow of its hand ’ (Booklist, starred review). Jack has caused an earthquake. He was trying to save his sister Lucy from being thrown down a well, but sometimes the magic doesn't quite work out. Not only does Jack demolish a monastery, but Lucy is carried off by the Lady of the Lake, and Jack has to follow her through the Hollow Road, which lies underground. Aided by Pega, a slave, and the berserker Thorgil, Jack encounters hobgoblins, kelpies, yarthkins, and elves—not the enchanted sprites one would expect, but fallen angels who steal human children for pets. In the eighth century, the world is caught between belief in the Old Gods and Christianity, and what Jack and his companions do will decide the fate of both religions. From National Book Award winner Nancy Farmer, this second book in the Sea of Trolls trilogy brilliantly enlarges the world of the first story. Look for the conclusion in *The Islands of the Blessed*.

Ruva, a young giraffe shipped to a San Francisco zoo, makes its way back home--through assorted adventures and perils--with the assistance of a cat, two rats, a street-smart chameleon and a runaway boy. By the author of *The Ear*, *the Eye* and *the Arm*.

"A historical fiction novel in verse detailing the life of Clara Lemlich and her struggle for women's labor rights in the early 20th century in New York."--
