written." --Mike Davis Every morning, the architect and writer Michael Sorkin walks from his apartment in Greenwich Village to his office in Tribeca. Unlike most commuters, Sorkin isn't in a hurry, and he doesn't try to drown out his surroundings. Instead, he's always paying attention. As he descends the narrow stairs of his town house, Sorkin explains why New York doesn't have the grand stairwells so common in European apartment buildings. Stepping out onto his block, he imagines a better, more efficient, far less dirty way to dispose of garbage. As he crosses Canal Street, he remembers the mad proposals for tunnels, elevated highways, and mega-structures that threatened lower Manhattan and could have destroyed its urban fabric.

Fifty years after Jane Jacobs's groundbreaking *The Death and Life of Great American Cities*, Sorkin's vision of city life is every bit as perceptive and fine-grained as that of Jacobs's classic. With important insights into history, architecture, and public policy, *Twenty Minutes in Manhattan* is an extraordinary, deeply personal look at a city undergoing--always undergoing--dramatic transformations"--

Every morning, the architect and writer Michael Sorkin walks downtown from his Greenwich Village apartment through Washington Square to his Tribeca office. Sorkin isn't in a hurry, and he never ignores his surroundings. Instead, he pays careful, close attention.

And in *Twenty Minutes in Manhattan*, he explains what he sees, what he imagines, what he knows—giving us extraordinary access to the layers of history, the feats of engineering and artistry, and the intense social drama that take place along a simple twenty-minute walk.

A radical architect examines the changing fortunes of the contemporary city Michael Sorkin is one of the most forthright and engaging architectural writers in the world. In *What Goes Up* he takes to task the public officials, developers, “civic” organizations, and other heroes of big money, who have made of Sorkin’s beloved New York a city of glittering towers and

increasing inequality. He unpacks not simply the forms and practices—from zoning and political deals to the finer points of architectural design—that shape cities today but also offers spirited advocacy for another kind of city, reimagined from the street up on a human scale, a home to sustainable, just, and fulfilling neighborhoods and public spaces. Informing his writing is a lifetime 's experience as an architect and urbanist. Sorkin writes of the joys and techniques of observing and inhabiting cities and buildings in order to both better understand and to more happily be in them. Sorkin has never been shy about naming names. He has been a scourge of design mediocrity and of the supine compliance of “ starchitects, ” who readily accede to the demands of

random composition. In this entertaining and provocative book, Michael Sorkin suggests that cities are similarly assembled by many players acting with varying autonomy in a complicit framework. An unfolding terrain of invention, the city is also a means of accommodating disparity, of contextualizing sometimes startling juxtapositions. Sorkin's aim is to widen the debate about the creation of buildings beyond the immediate issues of technology and design. He discusses the politics and culture of architecture with daring, often devastating, observations about the institutions and personalities who have dominated the profession over the past decade. Their preoccupation with the empty style of 'beach houses and Disneyland'

has consistently trivialized the full constructive scope of contemporary architecture's possibilities. Sorkin's interventions range from the development scandals of New York where 'skyscrapers stand at the intersection between grid and greed', through the deconstructivist architectural culture of Los Angeles, to the work and ideas of architects, developers and critics such as Alvar Aalto, Norman Foster, Paul Goldberger, Michael Graves, Coop Himmelblau, Philip Johnson, Leon Krier, Frank Lloyd Wright, Richard Rogers, Carlo Scarpa, James Stirling, Donald Trump, Tom Wolfe and Lebbeus Woods. Throughout Sorkin combines stinging polemic with a powerful call for a rebirth of architecture that is visionary and experimental--a recuperated 'dreamy
