Charlotte Crosby has been one of the UK's best-loved TV stars since she burst onto the celeb scene in 2011 with *Geordie Shore*. Laugh-out-loud hilarious, genuine, and a proper *Geordie*, Charlotte's popularity has even seen her crowned winner of 2013's *Celebrity Big Brother*. With her trademark humour and warmth, in *ME ME ME* Charlotte takes us on a very unique journey through her eventful teenage years (where literally nothing is off limits!), her attempts at holding down jobs (and booze), the life-changing experience of *Geordie Shore*, the truth about Gaz and his parsnip, and her inspiring weight-loss triumph. Full of drawings, doodles, and Charlotte's personal photos, this will be unlike any other celebrity autobiography on the market. Extremely personal, insanely honest and pant-wettingly funny.

genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, or lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.
