Chapman is a classic metal workshop book from 1940s England. It presents good basic hands-on knowledge of metal working, but needs newer texts to update materials and some machine tools. Workplace safety issues also need other books to update 1940s practices. Good book for a person, who is really interested in machine engineering and history ...

The book describes the general principles of different workshop processes such as primary and secondary shaping processes, metal joining methods, surface finishing and heat treatment. The workshop processes covered also include the hand-working processes such as benchwork, fitting, arc welding, sheet metal work, carpentry, blacksmithy and foundry. It also explains the importance of safety measures to be followed in workshop processes and details the procedure of writing the records of the practices. The tools and equipment used in each hand-working process are enumerated before elaborating the process. Finally, the book discusses the machining processes such as turning operations, the cutting tools and the tools used for measuring and marking, and explains the working principle of Engine
